

Neutrosophic Science International Association (NSIA)

Eminent Members

Members whose scientist, eminent researchers, did eminent works to service Neutrosophic logic by adopting of NSIA [their scientific works were supported and adopted by NSIA], As an example:

- Publishing at least one book in the field of Neutrosophic theory [with NSIA adopting].
- Translating at least one of the basic Neutrosophic books from English to any other language [with NSIA adopting].
- Attract other scientific researchers to work in Neutrosophic theory.
- Holding Symposiums (Seminars), and Conferences under the auspices of NSIA [fully auspices, partially auspices].
- NSIA will give a certification to the eminent member [that proves his membership with putting his/her name on the website of NSIA as an eminent member].
- Enter his/her name and affiliation in the International Encyclopedia for Neutrosophic [as eminent members].

Honorary Members

- Publishing at least one paper in a solid journal (i.e. having an impact factor and good reputation like NSS journal, CR journal and any other international solid journal) this paper must be in the field of Neutrosophic theory or Neutrosophic applications.
- Submit a request to being a membership (this request in the special template already approved by NSIA).
- see the URL [personal request for honorary membership \(1\)](#)
- After Basic Council acceptance, an honorary membership certificate would be sent by email.

National Groups / National Branches

In order to develop our network, the Association may endorse the creation of national groups within the framework and in the spirit of the by-laws of the Association. There cannot be more than one national group endorsed by the Association in each country.

Members of a national group can be, in particular, academics, scientists working in Neutrosophic theory and, in general, representatives of the various sciences interested in the activity and aims of NSIA. No association or group at the national level may use the name of the NSIA or claim to be part of its network if it has not been endorsed by the NSIA.
